immersive ai security

TECHNICAL SOLUTION BRIEF

AI Govern & Control

Scale AI, maintain control.

See how your workforce uses AI and turn potential risks into safer habits.

**The AI Governance overview follows prompts through detections to the action each employee took.*

Your proving ground for safe workforce AI

Enable AI adoption without blanket bans or blind spots:

- Workforce AI discovery
- AI tool and usage inventory
- On-device sensitive data detection
- Critical business risk categories
- Contextual in-browser warnings
- Connected Immersive One upskilling

ADOPT AI WITHOUT LOSING CONTROL

Discover and control AI usage across the workforce and deliver contextual warnings when risky interactions occur, supporting safer AI adoption without blanket restrictions.

MAKE AI GOVERNANCE VISIBLE

Understand which AI tools and models employees use and establish an evidence-backed view of workforce AI adoption to support governance decisions, internal oversight, and compliance programs.

PRIVATE BY DESIGN

Identify potential exposure of credentials, personal information, payment data, and other sensitive content across key business-relevant categories. Detect risky interactions on-device while keeping prompt content private.

RISKY MOMENTS BECOME STRONGER SKILLS

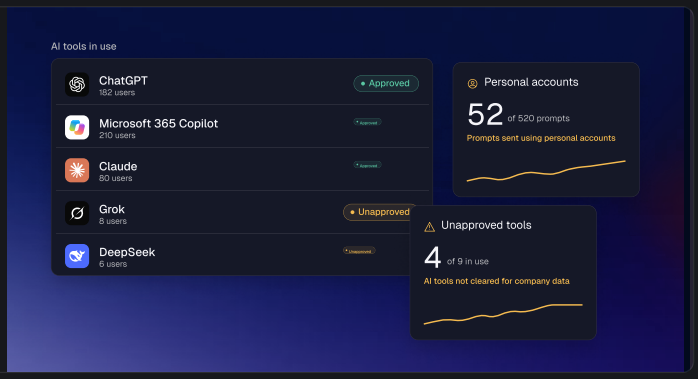

Move beyond one-size-fits-all awareness training. Connect detected AI security risks to Immersive One upskilling, giving employees opportunities to develop safer AI habits informed by real-world usage.

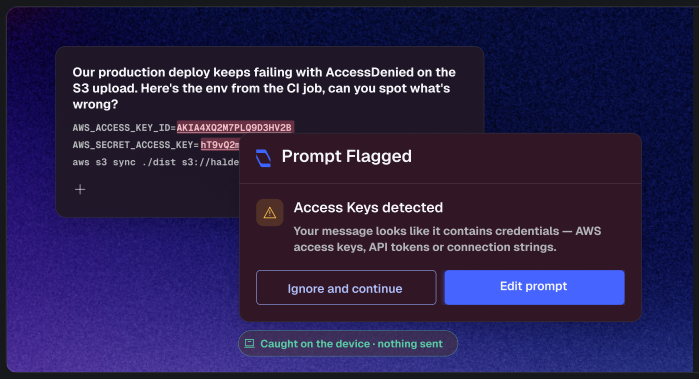

immersive ai security

TECHNICAL SOLUTION BRIEF

01 SHADOW AI DISCOVERY & CONTROL

Discover and control use of unapproved AI applications and unapproved personal AI accounts across the workforce.

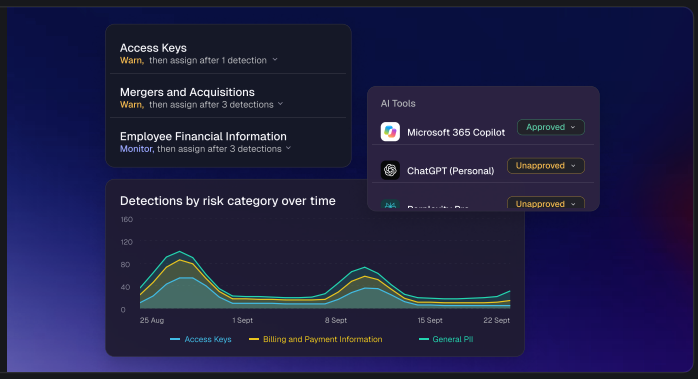

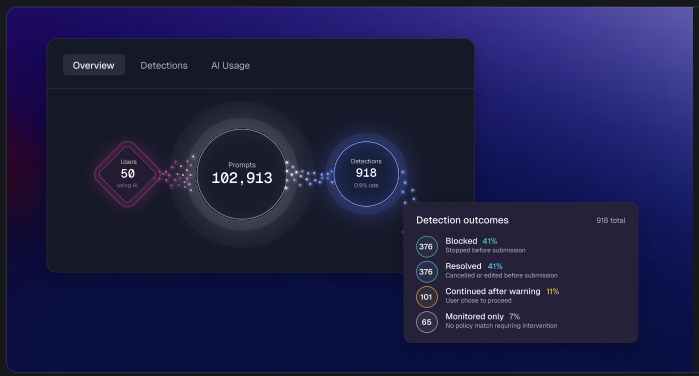

02 IN-BROWSER DETECTION & INTERVENTION

Detect when sensitive data could be exposed and intervene at the moment of risk across key categories of data exposure.

03 POLICY & DETECTION MANEGEMENT

Configure detections and enforce them for your business needs - control approved tools, activate rules, set enforcement mode, and tune configurations over time.

04 GOVERNANCE DASHBOARDS & REPORTING

Get a board-ready view of AI usage in and out of policy, repeat risky users and categories, shadow AI tools and accounts, and more.

05 SEAMLESS AI SECURITY TRAINING

Assign relevant training for repeat risky users and unapproved use in Immersive One to continuously remediate the behaviors that put the organization at risk.
