

The AI-Powered Platform for Provable Cyber Resilience

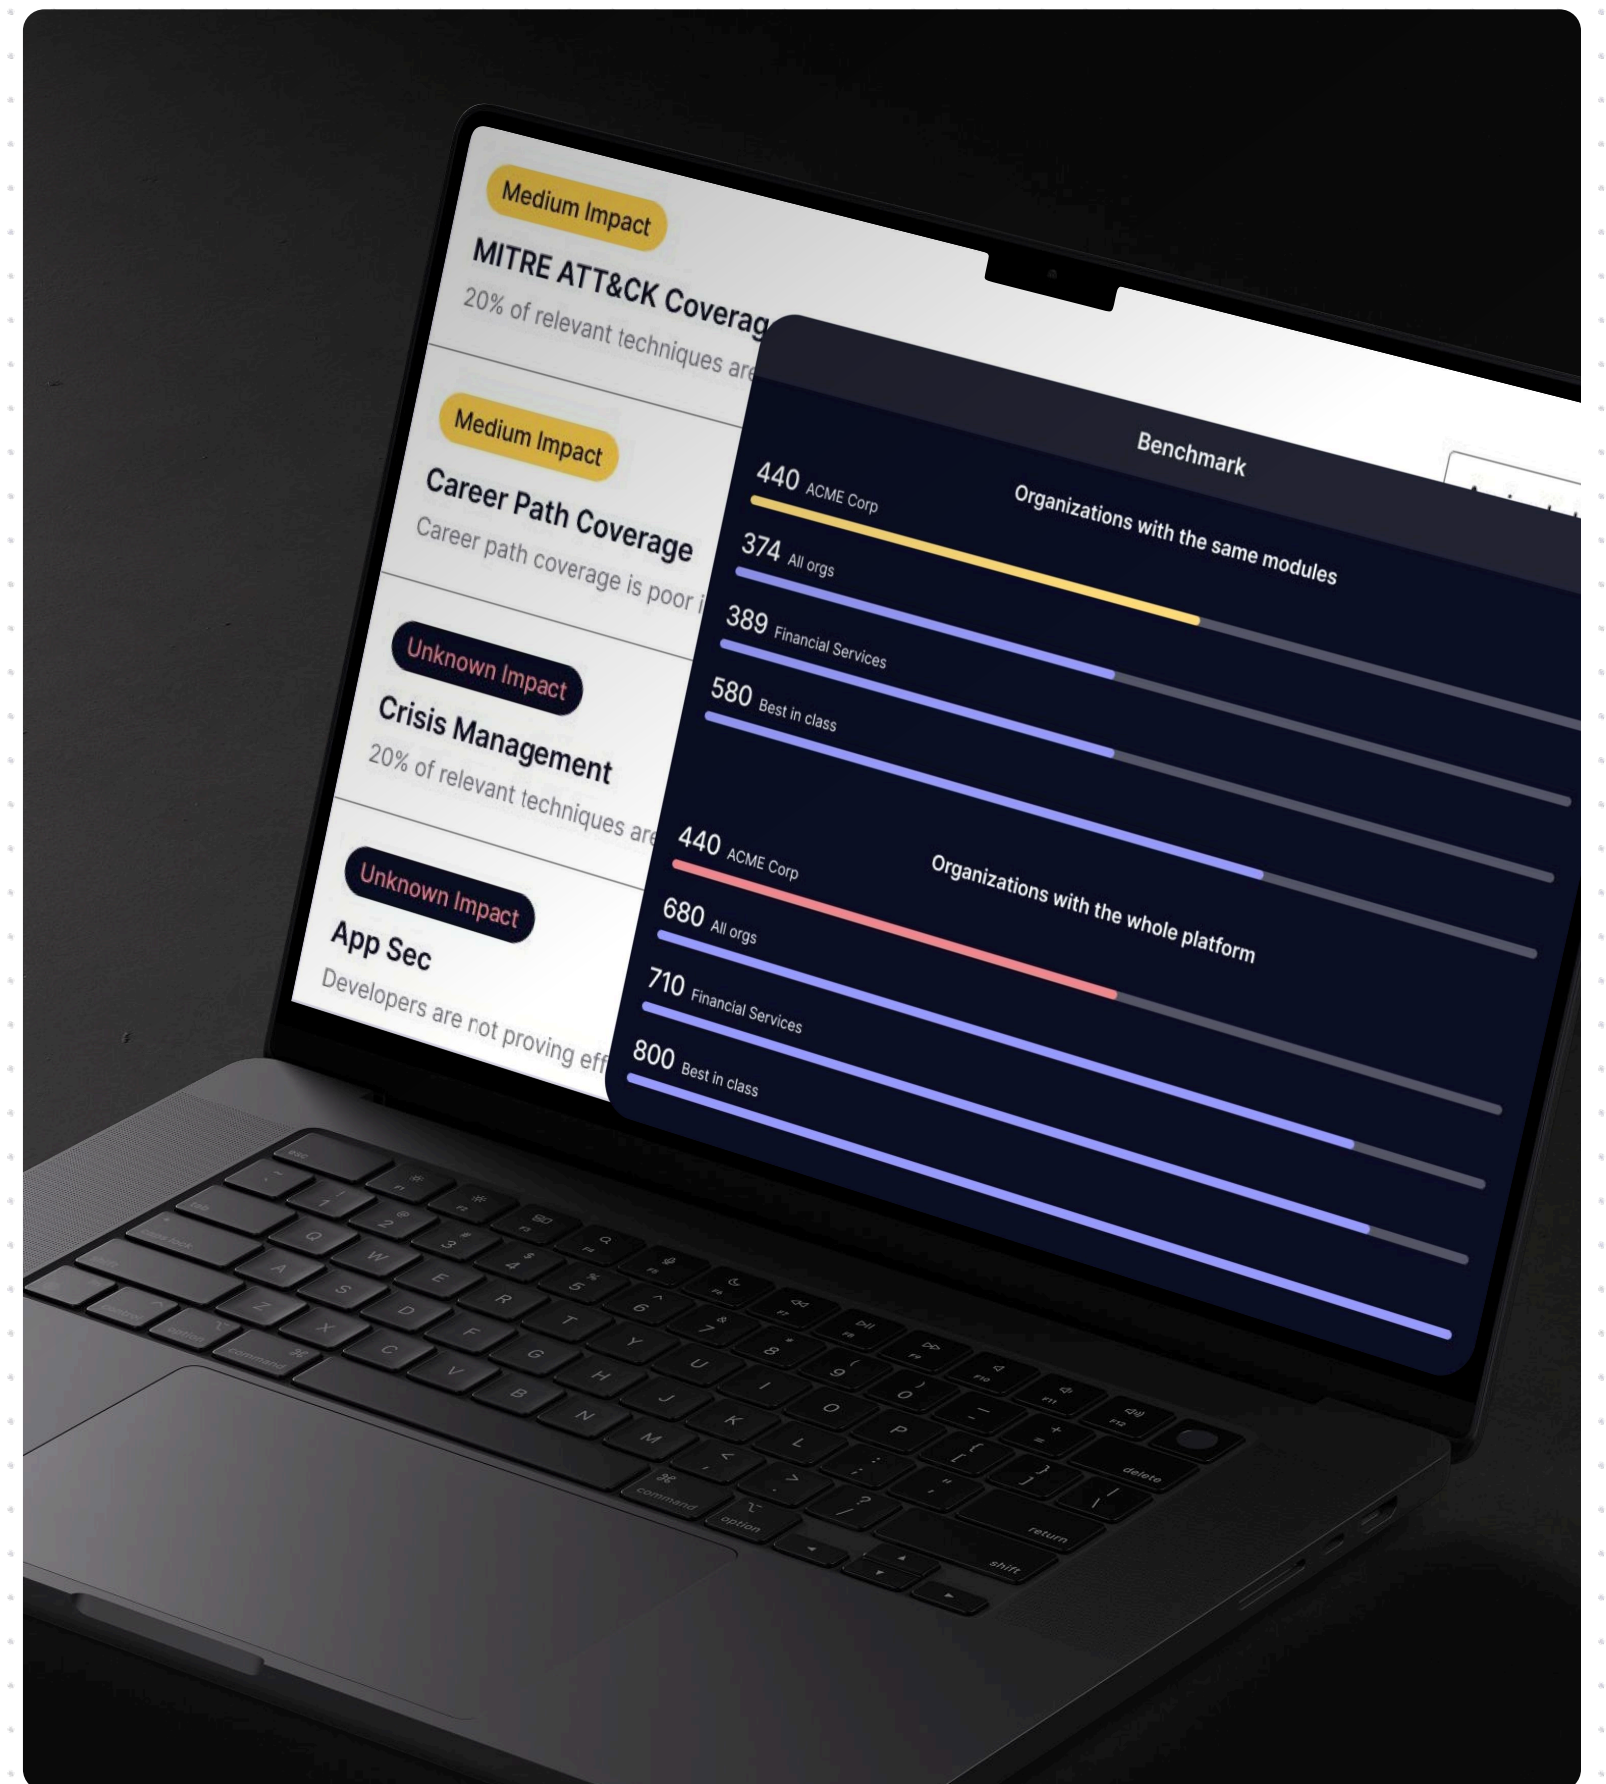

Oct 2025

Immersive One: The AI-Powered Platform for Provable Cyber Resilience

Organizations face unprecedented pressure: evolving threats from ransomware and AI-enabled attacks, stricter regulatory frameworks like DORA and NIS2, and a growing expectation from boards to show measurable cyber resilience. Traditional training and checkbox compliance no longer meet these demands —and leave security investments unproven.

Immersive One is the only unified SaaS platform built to move organizations beyond theory to proof. We equip you with the capabilities to prove your cyber strategy is effective, improve your team's skills and confidence, and clearly benchmark and report your cyber resilience to your board, auditors, and regulators. The result is a continuous, evidence-based approach that turns “we think we’re ready” into “we know we’re ready.”

The Immersive One Advantage

- **Prevent Critical Indecision in a Crisis:**
Optimize executive decision making and communication in critical incident response scenarios, powered by our AI Scenario Generator.
- **Build a Team That Outmaneuvers Attackers:**
Increase cyber proficiency across the attack surface, powered by our adaptive intelligent programs, which map to business initiatives and individual performance.
- **Slash Incident Response Times (MTTR):**
Reduce mean-time-to-response with the industry's only live-fire exercises that benchmark your entire security function's performance, powered by our Dynamic Threat Range.
- **Harden Your #1 Attack Surface:**
Drive cyber awareness across your workforce and evade AI-enabled attacks and other emerging threats with labs delivered in under 24 hours by our elite Container 7 team.

Trusted by the world's
largest organizations:

Be Ready.

Prove Cyber Resilience Across Teams and Scenarios

Security leaders have to prioritize investments to satisfy the board's oversight and prove resilience to regulators.

Immersive One amplifies your security investments by proving your team can execute critical processes using the tools they rely on. We capture performance data from hyper-realistic, framework-mapped scenarios developed by our elite threat intelligence team, Container 7. The result is undeniable evidence of how well your own people, processes, and technology perform under pressure—so you can improve your defenses before the next incident occurs.

- **Assess Leadership Readiness** to navigate a high-stakes cyber crisis with confidence.
- **Test Technical Defenses** to see how well your security stack holds up against real-world threats.
- **Validate Your Resilience Plan** by proving your teams act effectively under the pressure of a realistic, full-scale attack.

Improve Individual Cyber Skills Based on Real-World Threats

A resilient organization is built on skilled, confident professionals, but exercise completion isn't a reliable metric.

As a unified platform, Immersive One transforms weaknesses surfaced during simulations into growth opportunities. It delivers built-in, outcome-focused Adaptive Intelligent Programs that make it seamless to assign hands-on labs and exercises. Ultimately, your users—from developers to the SOC—build real, job-relevant skills that close critical readiness gaps across the entire threat lifecycle.

- **Close Gaps with Precision** by assigning role-specific labs that directly address identified weaknesses.
- **Drive Hands-On Skill Development** from secure coding in GitHub to cloud hardening in AWS and Azure, to malware investigation in CrowdStrike and Microsoft Sentinel, and beyond.
- **Optimize Your Entire Defense**, from non-technical teams to the C-suite, using our AI Lab Builder to tailor content to your unique requirements.

Be Ready.

Benchmark for Strategic Insight & Report Verifiable Proof of Resilience

Data without context doesn't tell you where you're most vulnerable.

Immersive One benchmarks performance against industry standards, uncovering the specific risk areas where you can make the greatest impact. We then help you translate readiness insights into an evidence package that communicates your resilience to stakeholders in terms they understand—and trust.

- **Guide Resilience Strategy** leveraging platform-aligned frameworks like MITRE ATT&CK and OWASP TOP 10.
- **Justify Security Investment** with contextualized insights that connect readiness activities to risk reduction and business goals.
- **Satisfy Auditor Requests** by reporting defensible progress against standards like DORA and NIST.

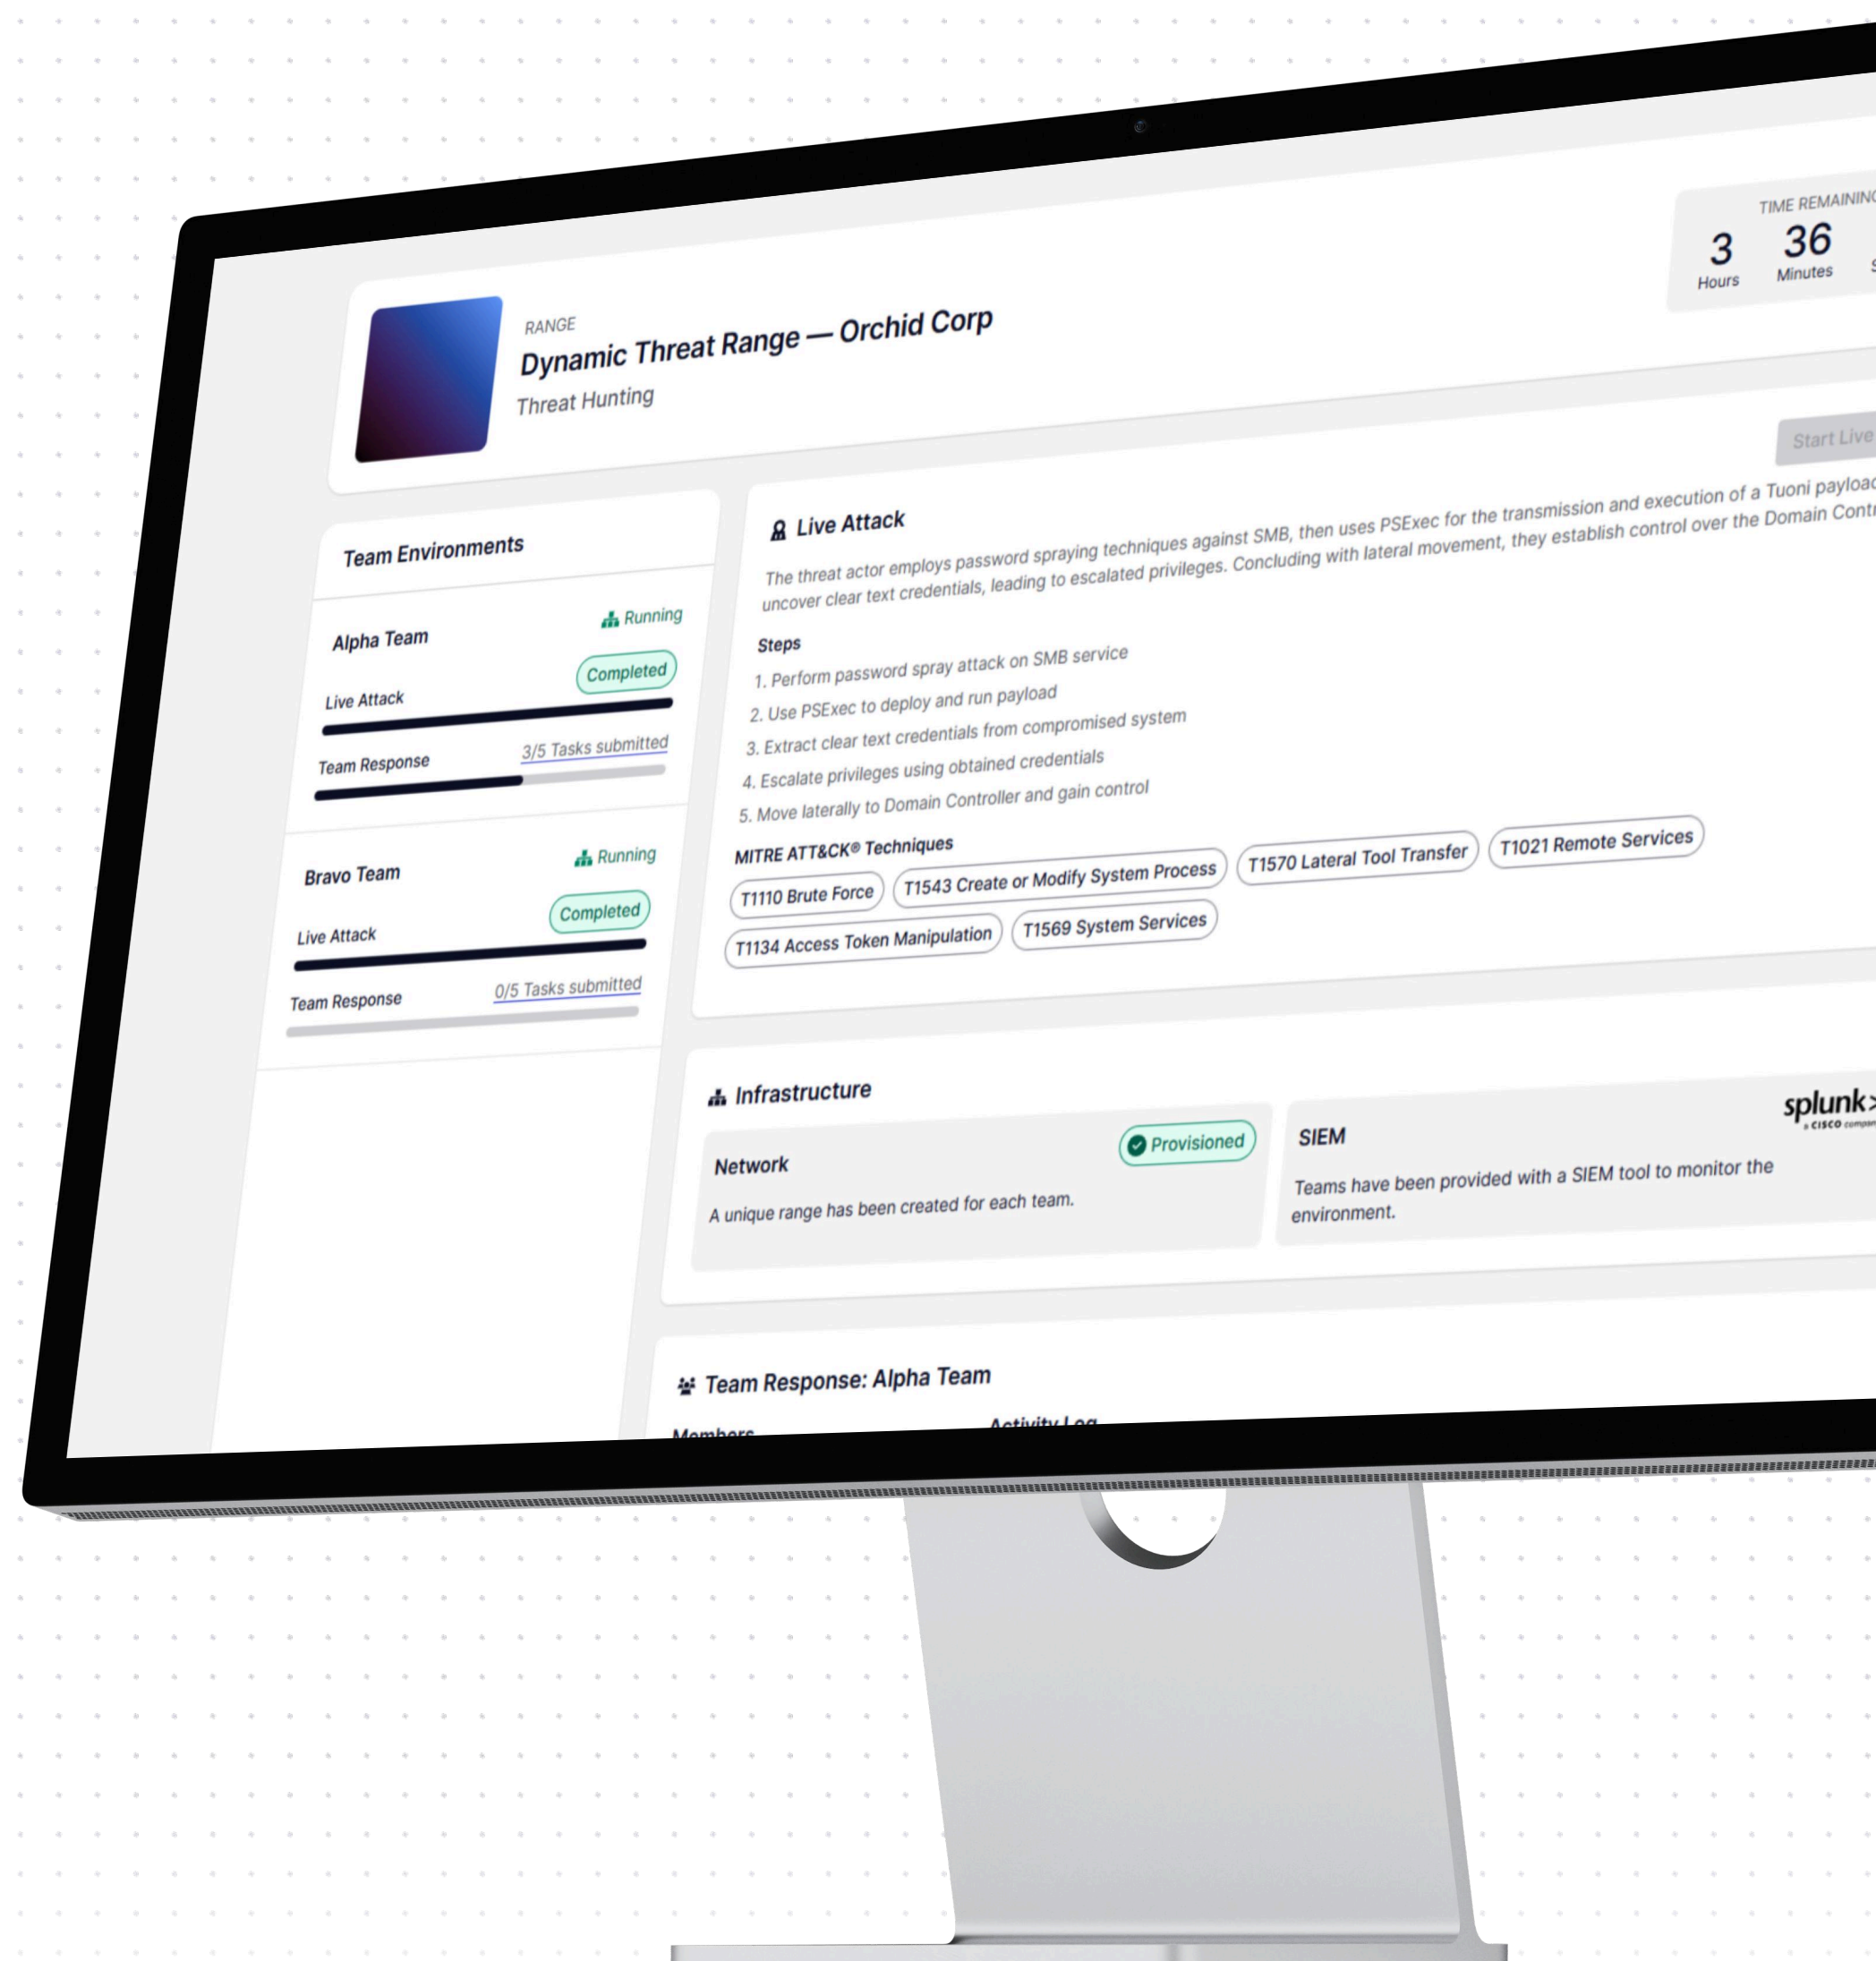

Be Ready with Immersive One

The next cyber incident is a matter of when, not if. Your board, regulators, and customers demand more than assurances—they require proof of resilience.

Immersive One is the strategic advantage you need: the single, unified platform that connects realistic simulations with targeted upskilling and verifiable proof.

Get the evidence-based insight that connects readiness to risk reduction, proves your resilience, and elevates your security investment. Be ready with Immersive One.
