

Immersive One:

The cyber proving ground for the AI enterprise

Prove and govern secure AI adoption across your enterprise

The Immersive One platform provides the cyber proving ground to safely adopt and govern AI across through interactive labs, live-fire ranges, and crisis simulations that exercise people and agents so the business can innovate rapidly and scale AI securely.

ADOPT AI SAFELY

Prove your workforce can use AI without expanding your attack surface.

- AI literacy & governance
- Role-specific AI entitlement
- Secure AI development
- Workforce micro exercises

DEVELOP & DEFEND AT AI SPEED

Prove your security teams can operate at the speed and sophistication the AI era demands.

- Agentic SOC & IR
- Hands-On Exercising
- Developer AI Ranges
- Dynamic Threat Ranges

LEAD THROUGH CRISIS

Prove your leadership and employees have built the muscle memory they will need to ensure they are ready for when AI accelerated issues arise.

- Scalable Incident Management
- Cyber Resilience Reporting
- Crisis Simulations & Cyber Drills

VALIDATE AI AGENTS

Prove security agents perform effectively, fail safely, use resources efficiently and stay governed under pressure.

- Agentic Evaluation Harness
- Agentic Red Teaming
- SOC Agent Efficacy

Built on a proven, trusted foundation

Immersive One's AI capabilities are powered by the same battle-tested platform trusted by the world's largest organizations.

HANDS-ON LABS

Move cyber learning from awareness to demonstrated skill across workforce, engineering, and security teams.

CYBER RANGE EXERCISES

Test technical teams in realistic environments where they practice detection, investigation, response, and decision-making before an incident is real.

DYNAMIC THREAT RANGE

Exercise defenders against full-chain attacks using realistic SIEM workflows to prove your technical teams can respond under pressure.

CRISIS SIMULATIONS

Rehearse cross-functional decision-making, escalation, incident response, and communication during high-stakes scenarios.

VENDOR-ENABLED REALISM

Validate human and AI readiness using your actual ecosystem, from CrowdStrike to MS Teams, and drive modern tool ROI.

CYBER RESILIENCE INSIGHTS

Benchmark performance across teams, cohorts, peers, and AI agents to contextualize exercising data and improve readiness.

Immersive One platform capabilities

Immersive One provides live, sandboxed environments to generate the empirical evidence needed to prove readiness in the AI era. The centralized platform allows you to pressure-test AI-assisted developer workflows, validate security operations, and continuously verify that your teams are adopting AI safely.

Core ranges and exercises map directly to industry standards like MITRE ATLAS, NIST, and DORA to provide your organization with framework-aligned evidence.

RESILIENCE PATHWAYS

Enable your teams with the knowledge and skills required to optimise secure usage of AI, before provisioning them the technology.

OFFENSIVE AI RANGES

Prove defenders can outpace machine-speed threats by launching AI red team agents against sandboxed, flag-capture ranges that expose real vulnerabilities.

AGENT TUNING

Validate agent behavior and cost efficiency before production, stress-testing AI archetypes against guardrails and prompt efficacy.

DEVELOPER AI RANGES

Identify AI-generated vulnerabilities and hallucinations before they merge by immersing developers in realistic sandboxes that eliminate structural risk early.

AGENTIC SOC SIMULATOR

Stress-test your SOC before a real incident with configurable injects that score human and AI decision-making under compressed timelines.

THREAT ACTOR INSIGHTS

Uncover high-risk defensive blind spots and remediate operational gaps by overlaying MITRE-mapped threat actor tactics directly onto live performance data.

MITRE ATLAS HEATMAP

Verify AI defense readiness with live mapping to the MITRE ATLAS framework and generate board-ready, objective evidence for regulators.

AI PROGRAM BUILDER

Create learning pathways for your teams, centred around what matters most to your business and timeboxed to meet your requirements.

AI LAB BUILDER

Build custom theory and practical labs tailored to your tech stack and internal playbooks, validating team performance against unique risks.

AI DATA EXPLORER

Curate the empirical evidence you need to prove organizational readiness by querying enterprise datasets with natural language processing.

Why enterprise organizations trust Immersive

Immersive provides continuous, empirical evidence to verify that an organization's people, workflows, and AI agents hold up under pressure. Through live-fire cyber ranges, simulations, and deep capability analytics, Immersive enables the world's largest organizations to accelerate digital innovation securely.
